No.1855/44/644, Bruges Series  
Polished brass with nickel plating  
For interior doors, 8mm square

Uses a maintenance-free round cover/long faceplate bearing support structure, for securing the door lock set and reducing the load on the lock cylinder nut. Self-tapping set screws ensure a rigid connection between the door handle and square spindle.

Requires a BB pin tumbler lock cylinder.

MPN ZT-Grt. BB Tobacco EAN Series

Polished brass with nickel plating

For interior doors, 8mm square

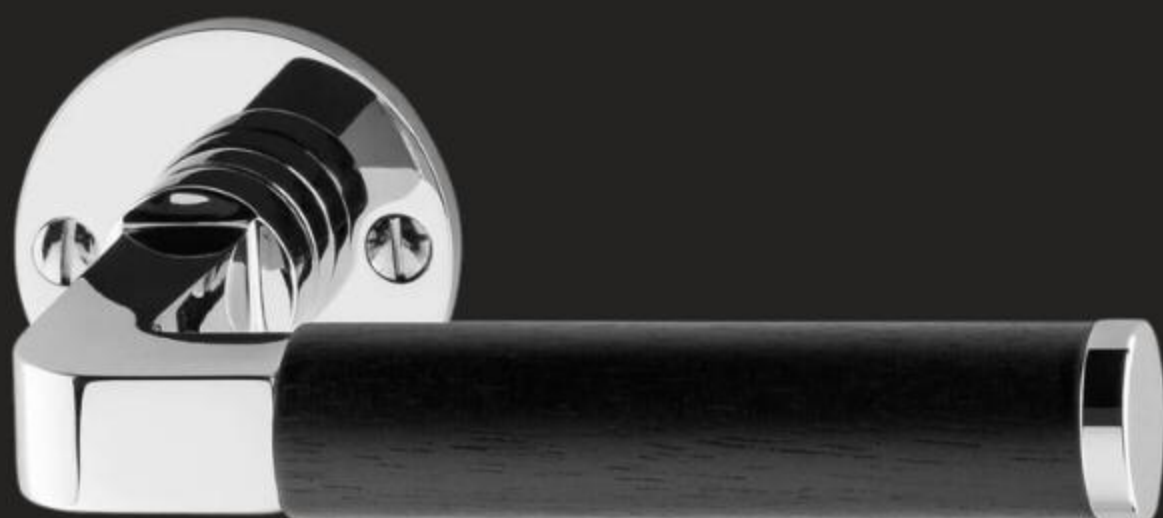

P. Meissen door bolt lock from the Art Deco period. Features flower-shaped or long-type bearings for maintenance-free operation, enhancing the stability of the lock components and reducing pressure on the lock cylinder. Comes with self-locking screws to ensure a strong force-fit connection between the bolt and the square spindle.

Requires BB pin cylinder.

**Rotatable mounted sliding storage for objects, stable press-fit  
fixing device, low-noise press operation system**

**Polished chrome-plated brass**

**For interior doors, 8mm square**

**P. Bisschop brass engineering door lock kit, Bauhaus style. The  
engineering handle is fixed-rotatable, maintenance-free and  
mounted on engineered sliding bearings; compliant with DIN EN  
1906 certification, usage category 4. Solid handle fixing structure  
meets high-strength usage requirements; built-in hidden Nylon 6  
spacer ensures long-term quiet operation of the handle and  
reduces the load on the square hole seat of the lock. Self-tapping  
set screws provide a strong, rigid connection between the handle  
and the square spindle.**

**Requires BB pin tumbler lock cylinder**
